Observations/Actions																
<p>Routine carried out on all bait stations on site. No takes on any of the bait boxes however multiple insects found on each insect monitor. Mainly in the goods in area. On further inspection I have identified multiple areas that require proofed/sealed to try and prevent this. Compressor warehouse is in need to a lot of proofing. A number of holes in the warehouse roof need to be sealed to prevent birds and flying insects from entering. Rusting areas starting to show daylight which in turn is allowing insects to get into the warehouse. 10 insect monitors added to the good in warehouse and more will be added Friday next week.</p>																

Rodenticides Usage	Insecticides Usage	Other Usage
		Insect monitors x10
